## Unipro 7002

### Unipro 7002 is Cutting Edge

The choice of professional teams and drivers.

### Laptimer and Data Recorder in one

Driver and mechanics can analyse results directly in the Laptimer display.

Unipro 7002 records data up to 10 times per second and allows data transfer to a laptop or desktop computer for further analysis.

The analysis software provides a complete overview that enables you to compare results between drivers, training sessions and heats.

### Features

|                                     |  |
|-------------------------------------|--|
| <b>Two-Way System</b>               | There is only one cable going to the steering wheel. This ensures a sturdy connection and reliable operation.  |
| <b>Thin Aluminium Casing</b>        | This elegant and durable display casing is just 15 millimetres and made of high quality aluminium.   |
| <b>Easy to Operate</b>              | Select the information you want to display. The large function buttons make it easy to scroll through data and get a quick overview of your results.   |
| <b>Advanced Analysis Software</b>   | Analyse and compare results from different laps, sessions and drivers with the free Analysis Software. This allows you to determine the best set-up of for both kart and engine.                                     |
| <b>Accurate RPM Calculation</b>     | Unipro Laptimers use the most advanced measuring system available. While many other systems measure engine revolutions as an average over several metres, Unipro calculates with an accuracy of approximately 15 cm. |
| <b>Adjustable Split Points</b>      | Define up to 8 Split Points on any track with the Unipro 7003 and Speed Kit. You can easily copy settings to other drivers to take full advantage of the feature.  |
| <b>Speed and Position Data</b>      | The Speed Kit tracks your speed and position. The kit delivers precise measurements and data to the Laptimer and computer analysis software. The Speed Kit is easy to install.                                       |
| <b>Your Choice of Receiver Type</b> | Choose between loop, magnet and IR receiver.   |
| <b>Additional Features</b>          | 3 temperature inputs, measurement of engine operation time, miles counter for up to 8 sets of tires. Logging of up to 8 ¾ hours of driving and up to 2000 laps.  |
